PROJECTS

FuelPro – Fuel Management & Enquiry System | Node.js, MS SQL Server

- Developed a full-stack web application for fuel management featuring secure OTP-based authentication using Crypto and in-memory storage with expiry logic.
- Built RESTful APIs to manage user enquiries and integrated EmailJS for automated notification handling.
- Designed and implemented a relational database schema in MS SQL Server, ensuring seamless connectivity via the msnodsqlv8 driver.

VS Code Live Stream & Collab | JavaScript, WebRTC, VS Code API, Node.js

- Engineered a VS Code extension enabling peer-to-peer video meetings and real-time code sharing directly within the editor using WebRTC.
- Implemented seamless synchronization of code buffers to allow multiple users to collaborate on the same file simultaneously.

ACHIEVEMENTS & ACTIVITIES

Winner - HackExpo S4

College-level Hackathon

Udupi, Karnataka

2025

- Awarded 1st Place for developing a collaborative VS Code extension that integrates video conferencing and live coding.
- Successfully demonstrated a working prototype involving complex peer-to-peer networking and editor API integration under a tight deadline.

Competitive Programming

Active problem solver on LeetCode and other coding platforms

Online

2023 – Present

- Consistently solving DSA problems spanning arrays, strings, trees, graphs, and dynamic programming.
- Maintained a steady rating of 1450+ on LeetCode with over 180 problems solved.
